Next Generation Mosaic

STUNNING MOSAIC FROM ONLY NATURAL STONE **ANY SIZE / ANY PICTURE**

We can recreate a picture of your choice from finest marble and travertine cubes, which can be applied to floors, walls and ceilings for interior or exterior decoration.

FROM ANCIENT TIMES TO THE PRESENT

ANY PICTURE

Start with your own tile artwork such as your own selfie, a magazine cutout, an original painting, or a hand-drawn drawing. It is simple to turn the image into a unique mosaic design with the help of our creative team.
The tile-work beautifully matches the original picture in a way that the essence of the work is preserved using real stones.

EASY TO CARRY

The tile-work can be carried in compact boxes regardless of mosaic size.

ANY SIZE

The tile-work can be produced very large sizes in relatively very short times. Imagine your selfie on the surface of a building with natural stones.

EASY TO INSTALL

The tile-work is constructed with the size of 310mmx310mmx10mm square pieces by simply arranging each square piece side by side according to its label.
It is that simple!

ADVANCE, INNOVATORY AND STATE OF ART PRODUCTION

Our unique manufacturing system, which runs faster with precision than ever processes the machine code generated by our software and fabricates the mosaic work, which consists of 310mmx310mmx10mm pieces.

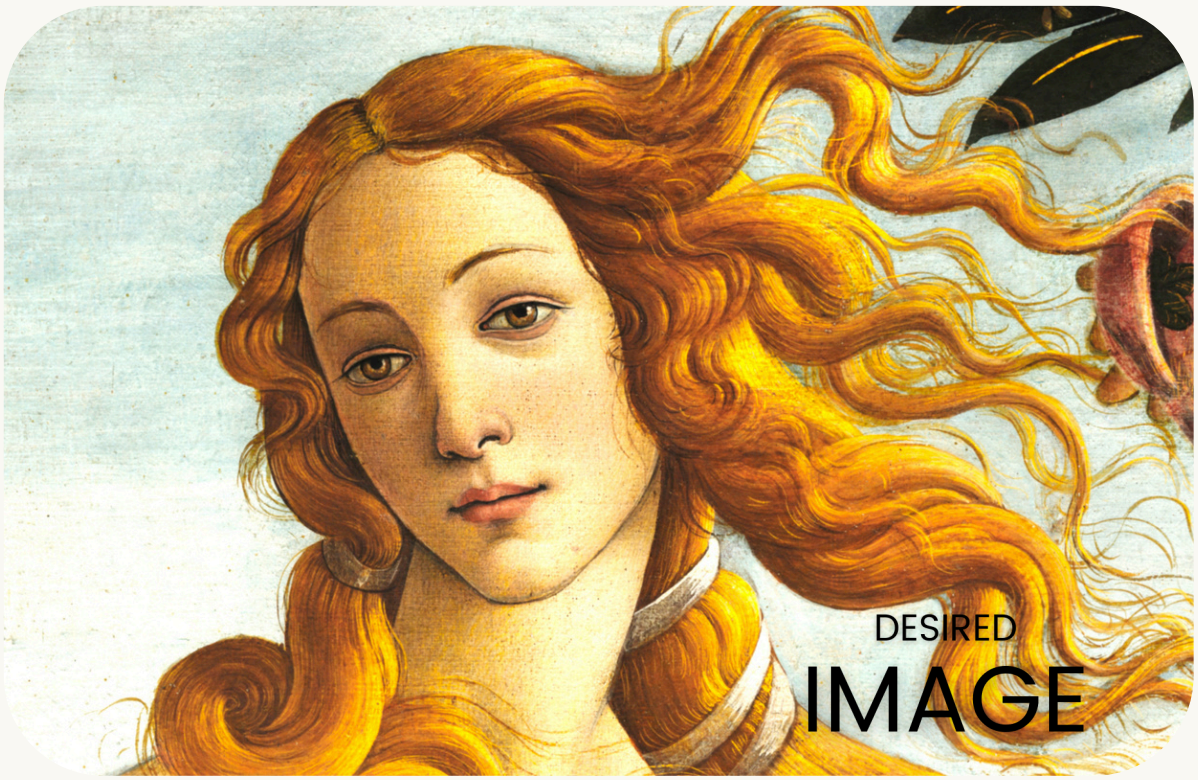
başaranlar® MARBLE & TRAVERTINE

New Generation Mosaic

Our tile-work (our personalized mosaic work) produced only by real stones is a new and unique product. We believe that it will set trends in the industry.
Create a tile-work (a personalized mosaic work) using any source of inspiration, such as an image, a wallpaper, or even just a concept.
Another option is to get ideas from Başaranlar's collections.
To realize your idea, the Başaranlar design team will work with the stone color palette representing finest real stones. With its adaptable design tools and in-house production, Başaranlar enables you to produce stunning work in no time.



Başaranlar Custom Mosaic Tile Design and Fabrication Process

SELECTING IMAGE

Start with your own tile artwork such as your own selfie, a magazine cutout, an original painting, or a hand-drawn drawing, then decide the mosaic size.

The tile-work can be produced in relatively very short times.

A unique feature of the tile-work is that it can be produced in very large sizes. Really very large sizes! Imagine your selfie on the surface of a building with natural stones.

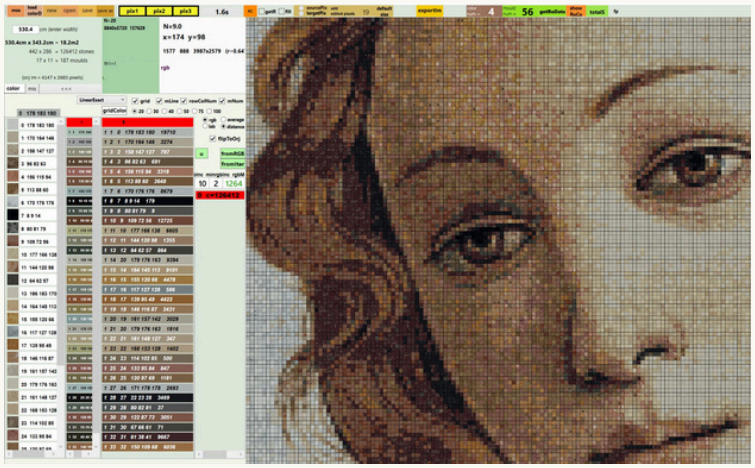
01

DESIGNING MOSAIC IMAGE

The selected image is converted to a custom digital version of the mosaic with our simulation software.

Since the digital version of mosaic is generated using the real pictures of stones, it is effortless for the customer to decide if the digital version of mosaic fulfills his or her expectations. See the picture on the right.

In other words, both the digital and produced tile-work beautifully match the original picture in a way that the essence of the work is preserved using real stones.



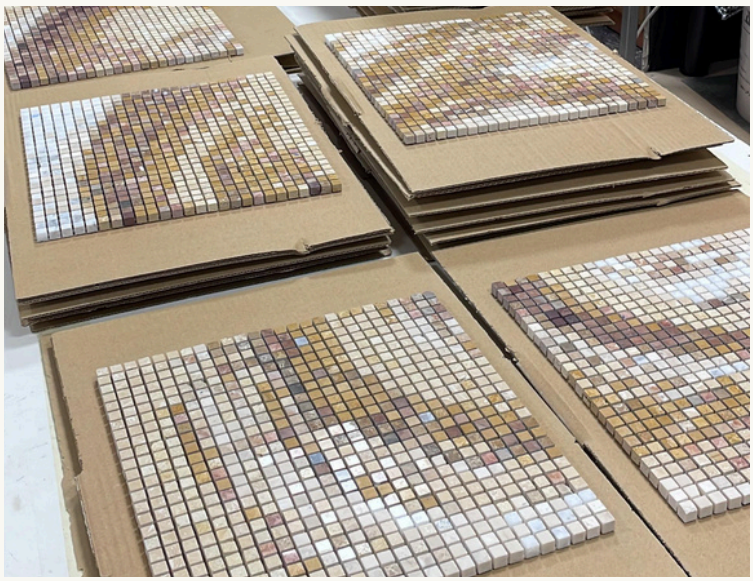
02

FAST PRODUCTION

Project timelines won't be impacted by the size of mosaic, simply because your mosaic is carefully arranged one by one with our unique robotic manufacturing system, which assembles mosaic faster with precision than ever.

Even if the mosaic size is 100m2 ,it is possible to produce it with a wide range of stone color options.

Our robotic system processes the machine code generated by the software and fabricates the mosaic work, which consists of 310mmx310mmx10mm pieces as seen the picture on the right.



03

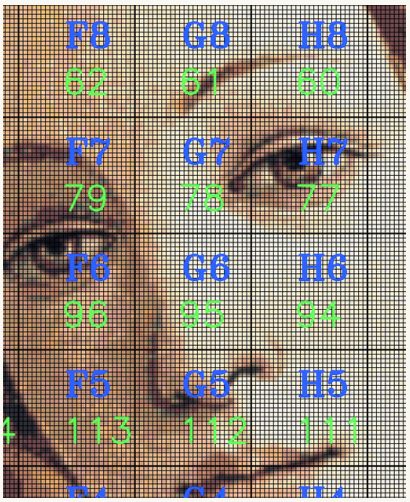
04

EASY TO CARRY

The tile-work can be carried in compact boxes regardless of mosaic size.

05

EASY INSTALLATION



Thanks to the alignment map, all pieces can be easily placed.

The tile-work is constructed with the size of 310mmx310mmx10mm square pieces by simply placing each square piece side by side according to its label.
It is that simple!

06

WATCH THE MAGIC

Just watch the mosaic that no one can remain indifferent to!
